tosi Connect, Visualize, Control.
Secure OT that scales.

DATASHEET

TOSI INSIGHT · OT NETWORK MONITORING

SEE WHAT'S HAPPENING ON YOUR OT NETWORK, FROM ANYWHERE

Tosi Insight watches the traffic crossing your gateways and alerts you when an asset starts acting unusual.

TOSI CONTROL
IS IT CONNECTED?
Secure remote access, with every connected asset in view.

TOSI INSIGHT
WHAT IS HAPPENING?
What each asset is doing, with an alert when something's unusual.

YOUR TEAM
ACT FROM ANYWHERE
Investigate remotely and decide what to do next.

TOSI CONTROL LOCKS THE FRONT DOOR. INSIGHT TELLS YOU WHEN SOMETHING INSIDE STARTS ACTING UNUSUAL.

Built for operators running distributed OT sites in manufacturing, utilities and water, oil and gas, building automation, and critical infrastructure.

ONLY 19%
of U.S. oil and gas operators continuously monitor 75% or more of their sites*

DETECT EARLY

- Watches every asset and learns its normal
- Risk-scored alerts, with the evidence to review
- The same evidence for security and operations
- Passive, with no scanning that disrupts production

COVER EVERY SITE

- Runs on the Tosi gateways you already own
- Turn it on for the sites you choose
- No new hardware or site visits
- No dedicated security team needed

WHAT INSIGHT DETECTS

- Unexpected connections
- New remote access
- Discovery activity
- Unusual outbound traffic
- Abnormal data movement

Not every detection is an attack. A malfunction or a runaway data cost is worth catching early too.

SEE IT ON YOUR OWN NETWORK

Ask your Tosi rep for a demo, or visit tosi.net/contact

*2026 Oil and Gas OT Decision Maker Survey, conducted independently by Dimensional Research on behalf of Tosi, April 2026.

ACT WITHOUT A SITE VISIT

1. **Get alerted** by email or in your own tools
2. **Investigate** the asset and what changed
3. **Trace** it to the source and decide what to do
4. **Report** it to management with built-in reports

The same traffic data helps your engineers troubleshoot remotely and send people onsite with a clear purpose.

TURN IT ON, AND INSIGHT STARTS ALERTING RIGHT AWAY AND KEEPS LEARNING AS YOUR NETWORK CHANGES.

TURN IT ON
Pick gateways in Tosi Control and flip the switch

ABOUT 30 MINUTES
First alerts start arriving

FROM DAY ONE
Traffic to known malicious addresses flagged

WEEKS 1 TO 3
Insight learns what's normal for each asset

YOU DECIDE WHAT COUNTS, AND WHERE IT GOES

Alerts That Mean Something

- ✓ 50+ event types, preset to industry best practice
- ✓ Recategorize events to fit your environment

Delivered Within Minutes

- ✓ In Tosi Control, and by email for the events you choose
- ✓ API connectors to a SIEM, SOAR, ticketing system or your own tools, with a small amount of setup

Put your Insight data to work in your AI. Ask about your network in plain language. Read-only and optional.

OPERATORS USING INSIGHT

Water Utility · Security Event
SCADA network team used Insight's evidence to shut off a risky vendor appliance.

Oil-Field Operator · Operational Event
Found malfunctioning equipment running up a Starlink bill.

> **The ability to extend our cybersecurity governance program into the OT environment with detailed reporting.**
>
> **Chris Isbell, OT Manager**
> Howard Energy Partners

FOR YOUR IT SECURITY TEAM

- ✓ Outbound only
- ✓ Encrypted in transit
- ✓ US or EU hosting
- ✓ Single sign-on

Ask your Tosi rep for our Information Security White Paper to learn more.

GET MORE FROM THE GATEWAYS YOU ALREADY OWN

Already use Tosi Control?
Turn Insight on, gateway by gateway.

New to Tosi?
